Some Recent Articles on Kathmandu: A Short Bibliography

By Pratyoush Onta

This is a short working bibliography of (mostly) recent journal articles and chapters in edited volumes in English related to the city and valley of Kathmandu. Books are not included here. This list was generated in my attempt to keep abreast with writings on my hometown. I have listed writings that I have read and/or seen cited in articles I have come across. Although I have done some additional research at the Martin Chautari Library to update this list in mid-2016, I have made no effort to be comprehensive.

I am uploading this list in the hope that it will be useful to MA students in Nepal (and others elsewhere) who are thinking about doing research on/related to Kathmandu. Veteran researchers and other readers should feel free to write to me with information about relevant missing items that should be included here. Please send such suggestions to my email: sinhas@mos.com.np.
